

Strengthening the management capacity of the Energy and Biomass Cluster from Republic of Moldova based on positive experience of Romanian Green Energy Innovative Biomass Cluster

Project information

- Implementation unit: Energy and Biomass Cluster (RM) and Green Energy Cluster (RO)
- Implementation time frame: January-November, 2018
- Budget: 10,000 Euro
- Financing source: EaP Plus Program

Objectives

- Exchange of experience in the Cluster management area between Moldavian and Romanian clusters
- Establishment the framework of cooperation between Moldavian and Romanian Clusters
- Promote the cluster cooperation model within the relevant Energy areas in Republic of Moldova

Activities

- Management team missions
- Preparation a Memorandum of Understanding between Romanian and Moldavian Clusters.
- Organisation of EU Sustainable Energy Week (joint event in Moldova).
- Communication activities to inform the cluster members and other relevant stakeholders about opportunities about cluster collaboration model based on the experience of Moldovan and Romanian Clusters.

Management team missions

Site visits

Common events within EUSEW 2018

Signing the MoU

Outcomes

- Minimum 10 representatives of the Moldavian Cluster will go in a study visit to the EU cluster to understand the biomass value chain on the entire cycle from the collection of raw material till the heat production.
- Management team of the EU Cluster will visit Moldova during EU Sustainable Energy week.
- One MoU prepared.
- A Joint event within EU Sustainable Energy Week organised (round table, presentation of the Clusters cooperation perspectives, signing the MoU, etc.).
- One MoU signed within a public event during EU Sustainable Energy Week.
- Minimum 3 News letters will be elaborated and disseminated to media and relevant actors in the energy sector of Moldova and Romania (more than 2500 recipients).
